ORGANIZATION

Cesaroni Design Associates was incorporated on August 13, 1979. From product conception to market introduction we are continuing our effort to offer you the best in industrial design, product research, graphic user interface design, ergonomic analysis, model building, prototyping and branding. We also have skilled tooling and molding partners who are ready to assist in your product development venture.

ONGOING TRAINING PROGRAM

Our designers are continually introduced to new materials and processes. Seminars, conferences, software training, industry trade shows and conventions are regularly attended to remain on the cutting edge of technology.

CONFIDENTIALITY

We always honor our client's confidentiality agreements, and when a retainer is provided, offer strict exclusivity in a particular product market.

PATENTS

All patents, trademarks and registrations, present and future, issued thereon, in the United States and/or foreign countries procured, shall accrue to the benefit of and be for the perpetual use of the client, free of any charge, as they may apply to the project. It is, however, the client's responsibility to investigate any such patents, trademarks, or registrations.

STAFF

Cesaroni Design Associates, Inc. currently employs ten degreed professionals, including seven industrial designers, one graphic designer, one psychologist major and one financial officer.

DESIGN CAPABILITIES

Cesaroni Design Associates, Inc. will provide all phases of product development including:

Industrial Design

BW concept sketches
Aesthetic design and color exploration
Ergonomic design and evaluation
2D detail drawings*
3D concept renderings*
3D styling model geometry*
3D final ID surface geometry*
3D prototype design and development
Graphic design, including icons and logos
Graphic user interface design
Product control panel graphics
Design for manufacturability & assembly (DFMA)
Design for installation and service
Materials research and recommendation
Manufacturing methods and evaluation
Cost analysis and reduction
Vendor exploration and evaluation
Program scheduling
Resource coordination

Models and Prototypes

Concept modeling: foam core, foam, wood, clay
Aesthetic styling models
Breadboard models/ proof-of-concept models
Functional prototypes
Custom painting, finishing, color matching
CNC machining
Object Modeling
SLA (natural and finished parts)
Rubber molds and urethane cast parts
Vacuum forming
Silk-screening
Pattern work

*Our designers are proficient with the following software: SolidWorks, Adobe Photoshop, Adobe PhotoWorks, Adobe Illustrator and CorelDraw.

Market Research

Competitive product analysis
Internet research
Concept and prototype evaluation
Task analysis
Observational user research
User testing and evaluation
